DESCRIPTIONS

The EB232(32)X-10D(I) series single mode transceivers are high performance, cost effective modules supporting data rate of 25.78Gbps and 10km transmission distance with SMF. The EB232(32)X-10D(I) module is designed for single mode fiber and operates at a nominal wavelength of 1270nm or 1330nm; the transmitter section uses a multiple quantum well DFB, which is class 1 laser compliant according to International Safety Standard IEC-60825.

The SFP28 10km module electrical interface is compliant to SFI electrical specifications. The transmitter input and receiver output impedance is 100 Ohms differential. Data lines are internally AC coupled. The module provides differential termination and reduce differential to common mode conversion for quality signal termination and low EMI.
