

EB29(92)Y-80D-B

100G QSFP28 ZR4 BIDI Optical Transceiver

PRODUCT FEATURES

- Support line rates from 103.125 Gb/s;
- Lane bit rate 25.78 Gb/s 100GE
- Up to 80km transmission with KR4-FEC.
- LAN WDM EML laser and PIN receiver with SOA;
- Support Multi-Pin function with IntL/RxLOSL and LPMODE/TxDIS;
- High speed I/O electrical interface (CAUI-4);
- I2C interface with integrated Digital Diagnostic monitoring;
- QSFP28 MSA package with simplex LC connector;
- Single +3.3V power supply

Power dissipation

Commercial: < 5.5W

- Complies with EU Directive 2015/863/EU

APPLICATIONS

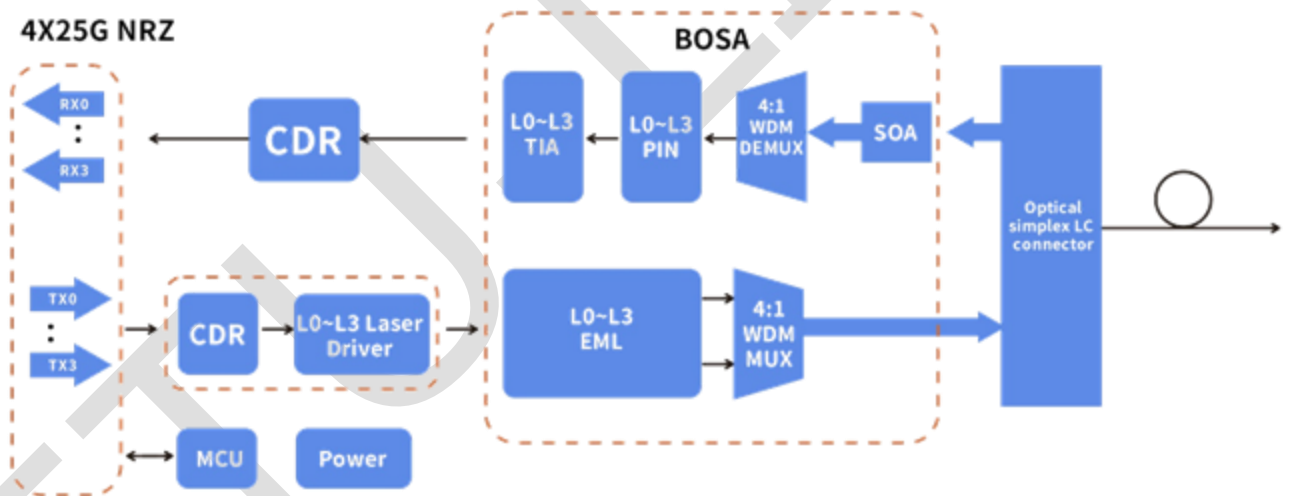

- 100GBASE-ZR4 Ethernet
- 100G Datacom & Telecom connections

Description

ETU-LINK's EB29(92)Y-80D-B is designed for 80km optical communication applications. Optical transceiver integrates the transmit and receive path onto one module. On the transmit side, four lanes of serial data streams are recovered, retimed, and passed on to four laser drivers, which control four electric-absorption modulated lasers (Lan-WDM) with 1273,1278,1282,1286, 1296, 1300, 1305, and 1309 nm center wavelengths. The optical signals are then multiplexed into a single-mode fiber through an industry-standard LC connector. On the receive side, four lanes of optical data streams are optically DE multiplexed by an integrated optical DE multiplexer. After the optical signal is amplified by SOA, DEMUX separates four channels which are recovered by PIN photodetector and cross-impedance amplifier, retimed and passed on to an output driver. This module features a hot-pluggable electrical interface, low power consumption, and 2-wire serial interface.

Notes:

1. GND is the symbol for signal and supply (power) common for the QSFP28 module. All are common within the QSFP28 module and all module voltages are referenced to this potential unless otherwise noted. Connect these directly to the host board signal-common ground plane.
2. Vcc Rx, Vcc1 and Vcc Tx are the receiver and transmitter power supplies and shall be applied concurrently. Requirements defined for the host side of the Host Edge Card Connector are listed in MSA. The connector pins are each rated for a maximum current of 1000 Ma.
